

### Season's Greenest Greetings

Happy holidays from WM. We've rounded up some tips for reducing your environmental impact this season, from last-minute (sustainable) gifting to recycling rules for the holiday and every day.

When it's time to reclaim your living room, look for local guidelines regarding tree pickups or drop-off locations. We appreciate your business.

### Reduce, Reuse, Rejoice

#### Enroll in Paperless Billing

Use less paper – and keep bills from getting lost in holiday mail – by enrolling in Paperless billing.

#### Donate Decorations

Bring holiday cheer to a local senior citizen center or after-school program by donating some of your extra decor.

#### Wrap Consciously

If you do find the perfect item, skip the single-use wrap – opt for reusable or simple, recyclable paper or regift festive bags.

#### Reuse Boxes

Upcycle cardboard boxes for gifts, then break them down before adding them to your recycling container.

#### Think Twice for Holiday Lights

String lights don't belong in your curbside recycling – check with local government, retailers or programs for drop-off locations.

### Recycle Right

Recycle clean bottles, cans, paper and cardboard.

Keep food and liquid out of your recycling.

No loose plastic bags and no bagged recyclables.
